■ RESUME SUMMARY

Computer Science Engineering student with knowledge of Python, Java, HTML, CSS, and Flask. Interested in Software Development, Web Development, and Cybersecurity. Passionate about building real-world projects and continuously improving technical skills through hackathons and certifications.

• EDUCATION

- **B.Tech Computer Science (Pursuing 3rd year , 2024–2028)**

Deogiri Institute of Engineering and Management Studies | CGPA: 6.7

- **Higher Secondary Education** – Government College of Arts and Science | Percentage:61%
 - **SSC** – Late Sindhu Memorial High School | Percentage: 87%
-

• TECHNICAL SKILLS

- **Programming Languages** : Python, JAVA, HTML, CSS, JavaScript(Basic)
 - **Database** : SQLite , MySQL
 - **Tools** : Git, GitHub , VS Code, Android Studio , MS Excel , Arduino IDE
 - **Basics** : App Development , Web Development, Data Analytics & Visualization
 - **Typing speed** : English (30-40 WPM) , Marathi (30 WPM)
-

• PROJECTS

- **Emergency Alert System App** (Java, Android Studio)
 - Developed an Android-based Emergency Alert System using Java.
 - Implemented SOS alerts and emergency calling features. ○ Integrated GPS location sharing for real-time emergency tracking. ○ Designed a user-friendly interface for quick emergency response.
 - **Technologies:** Java | Android Studio | XML | GPS | SQLite
 - **Online Polling System (Ongoing)**
 - Developing a secure web-based online polling system with user authentication and vote management using Python Flask, HTML, CSS, JavaScript, and SQLite.
 - **Google Solution Challenge Hackathon** – Participated in problem-solving and collaborated on developing innovative software solutions.
 - **Arduino Workshop** – Hands-on experience with embedded systems.
-

• CERTIFICATIONS

- Linux Foundation – Cybersecurity Essentials (LFC108)
- Deloitte – Cyber Job Simulation
- TATA - GenAI Powered Data Analytics Job Simulation
- Great Learning: Programming Languages
